ENGR. JUSTIN L. BRIONES

Safe Water Agency, a USAID-Funded Project
DAI Global LLC Room 317 & 318 VSB Bldg.
6th & 7th Lacson Streets, Bacolod City\

Dear Engr. Briones:

The Sidalay Water District committed to promote better quality of life by providing adequate, safe and potable water to all Sidalaynon through honest and efficient service as a sole water utility provider in the City of Sipalay.

In line with this the Sidalay Water District has an approved NDDRMF/Odette Project under GAA 2021 which covers the water supply system construction of Brgy. San Jose and Brgy. 4. The project includes construction and development of water sources, construction of reservoir, pumping station and pipe laying with the total approved budget of P74M.

Since Sidalay Water District has a limited manpower and technical experts to effectively perform to do such planning and analyzing data from different inputs of water related research and developments. As I have discussed with the Board of Directors the possibility of your office to provide us your technical assistance, they are expressing their gratitude to USAID and optimistic approval of my proposal. Therefore we are requesting your office to send us your technical experts to assist and help us in the planning and development of hydraulic modeling of the aforementioned project for the basis of our design.

May our joint endeavor will result in highly effective and efficient model that would bring the future development of all water districts.

Hoping from your favorable response regarding this matter.

Thank you and best regards.

Sincerely yours,

AR. EDGARDO C. CUAYCONG JR.
General Manager
